

How to connect your Magic-Flyer auto pilot

Cut four strips into two strips of Magic paper or use the friends of the magic account if you are already underway

Make two identical wings

by weaving one into the other

Make sure the ends stick out at each end

(at the front and back)

Gently pull the strips tight

And you will have

a head and a tail

Once your fingers are more nimble and you have mastered the magic, you can make the deluxe 6-strip version - it's a bit more fantastick.
